Experience

Front-End Web Development

Next24tech

I worked on a personal project to create my own portfolio website during my internship. During my internship, I developed a personal portfolio website to showcase my skills, projects, and achievements. The project involved designing a user-friendly and responsive interface, integrating it with modern web technologies like HTML, CSS. The website serves as a platform to highlight my technical expertise, creative projects, and work experience. Building this site helped me strengthen my skills in web development, design principles, and project management.

Feb 2024 – Apr 2024

Projects

Iris-Based Authentication and Key Agreement With Updatable Blind Credentials

Python

I am developing an Iris-Based Authentication and Key Agreement system with Updatable Blind Credentials, focusing on biometric security and privacy. The system ensures secure user authentication with dynamic credential updates to enhance protection against potential breaches.
